PROFESSIONAL SUMMARY:

Full Stack Software Engineer with 3.9 years of experience building scalable backend systems and responsive web applications using Java, Spring Boot, React.js, TypeScript, PostgreSQL, and AWS. Experienced in microservices, CI/CD automation, Kubernetes deployments, and performance optimization for enterprise-scale applications.

SKILLS SUMMARY

- **Languages:** Java, TypeScript, Kotlin, Python
 - **Frameworks:** Spring Boot, Node.js, Express.js, React.js
 - **Databases:** PostgreSQL, MongoDB
 - **Data Modeling:** SQL & NoSQL schema design, indexing, query optimization, Hibernate/JPA
 - **Cloud & DevOps:** AWS (EC2, S3, RDS, IAM), Docker, Kubernetes, CI/CD, Concourse
 - **Testing:** JUnit 5, Jest, Mockito, Integration Testing
 - **Monitoring:** Grafana, Datadog, ELK Stack, CloudWatch
 - **Concepts:** Data Structures, System Design, Multithreading, REST APIs, Microservices Architecture, Spring Security, Linux, Exception Handling, Kafka, JWT/OAuth
 - **AI-Driven Development:** Leveraging GenAI, LLMs, and Agentic AI workflows for code generation, debugging, automation, and engineering productivity enhancement.
-

PROFESSIONAL EXPERIENCE:

Outcomes India Pvt LTD | Software Engineer - 2 | Bengaluru | Aug 2023 - Present

- Integrated Salesforce and developed a Spring Batch System to automate business processes, processing over **1M+ CSV** records daily, **reducing** manual effort by **80%**, improving efficiency and system stability.
- Upgraded legacy application from Java 11 to **Java 25** and modernized Spring Boot framework, enhancing performance, security, and long-term maintainability.
- Led performance optimization initiatives reducing API latency by **40%** across critical services.
- Deployed containerized apps to **Kubernetes** clusters, using ArgoCD across multiple cross-functional teams, enabling **faster release cycles** from 2 weeks to 3 days and supporting **24/7 uptime**.
- Reduced document retrieval time by **20%** by optimizing Elasticsearch queries for metadata-based document searches.
- Designed and maintained fault-tolerant microservices deployed on Kubernetes, ensuring 99.9% system availability.
- Developed dynamic, responsive UI components using **React.js** and **TypeScript**, enhancing user experience and reducing page load time by **25%**

Cardinal Health International India | Analyst Software Engineer | Bengaluru | Sep 2022 – Aug 2023

- Built a scalable web application with Node.js, React.js, and RESTful APIs (Java/Node.js), accelerating load times by **30%** through caching and query optimization.
- Led the migration of monolithic legacy systems to microservices-based architecture, improving system reliability by **40%** and reducing downtime.
- Automated CI/CD pipelines with Concourse CI, reducing deployment time by **50%**.
- Automated pre-deployment validation using GitHub Actions, identifying linting issues, test failures, and build errors early, reducing code review time by **40%** and improving deployment success rate by **50%**.

Cardinal Health International India | Internship | Bengaluru | Mar 2022 - Aug 2022

- Developed full-stack features using React.js and Node.js while gaining hands-on experience in REST APIs, microservices, unit testing, and Agile development practices.

EDUCATION:

NMAM Institute of Technology, Nitte — Karkala, Karnataka

Master of Computer Applications (MCA) | GPA: 8.2

Sept 2019 – Aug 2022
